# Citator+™

The most authoritative index of English Case Law.

**Citator+** tells you if the case that you are looking at is still good law.

But more than that it provides you with a detailed analysis of the exact considerations that a case has received. Unlike other providers, we don't take a 'broad brush' approach; with over 12 consideration types, we give you the accurate shade of consideration. Put simply, we give you more than just good, bad or indifferent.

## A door to the rest...

Not only is **Citator+** the most accurate, it's comprehensive.

Find information on all of the ICLR's reports, plus the All England Law Reports, Criminal Appeal Reports, Lloyd's Law Reports, Road Traffic Reports, Local Government Reports and Tax Cases.

**No Algorithms**, just clever human beings.

An algorithm is a clever way of calculating a function; they are used for various software tools and services. But human editors, professionally qualified barristers and solicitors, are unbeatable.

**Citator+** isn't made of algorithms, it's made up of human research and input. So, like everything else that ICLR does, you can be sure it's accurate.

## Fast, comprehensive coverage

Finally, unlike other legal research platforms, the important case consideration information, along with subject matter, appellate history, legislation considered and commentary, is all presented side by side with the full text case report that you are viewing. There's no need to navigate away from that all-important case document.

And at no extra cost, you have access to the very best case index material as standard with your subscription to ICLR Online.
